The Electronic Newsletter of the Michigan Psychiatric Society

October 2016 Newsletter

FROM THE MPS PRESIDENT

Greetings!

Recently, the Surgeon General of the United States visited Flint, Michigan. The US Congress passed a bill allocating funds for Flint's water system. The Attorney General for the State of Michigan is continuing his investigation.

The MPS task force on Flint has a new chairperson, Dr. Dayna Leplatte-Ogini, a child adolescent psychiatrist from the University of Michigan. Dr. Todd Rosen, is the Genessee County medical director and is a member of the MPS task force on the water crisis .

He informs us that many entities such as SAMHS, the CS Mott foundation, and Authority Health Interventions help centers have provided grants to assist with the crisis. Michigan State University is helping to address the manpower shortage of child psychiatrists in Flint by having supervised child-adolescent fellows rotate through there.

Many members of MPS are wondering what they can do to help with the crisis in Flint. Dr. Leplatte-Ogini has been in contact with Nancy Kirsch , who works at the Genessee county CMH office. She is coordinating volunteer services for mental health. Flint needs help "filling in the gap " with regards to mental health services. MPS psychiatrists have unique training that allows them to help the people of Flint. The outreach workers will require training about psychotropic medications. You may reach out to Nancy Kirsch via her email [-nkirsh@genhs.org](mailto:nkirsh@genhs.org) if you are interested in volunteering. You may volunteer in person or perhaps online via telepsychiatry to provide your expertise. Both adult and child psychiatrists are needed to help.

Sincerely,

Nina L Anderson, MD

The MPS hosted this very successful session September 24. Evaluations were positive and the focus of the session was informative and should be applicable for most members in their daily practice.

Special thank you to Dr. William Cardasis and the team at St. Mary Mercy Hospital in Livonia for hosting the event in such a beautiful location.

Thank you also to our sponsoring partners PRMS and Corizon Health.

MPS Integrated Care Training participants

Our presenter Dr. John Kern

If you are interested in learning more about the Great Lakes Practice Transformation Network, please contact Greg Makris, MD at Gregory.Makris@altarum.org.

Did you miss the training? You can access it online with the APA!

All of the APA Integrated Care training modules are available at www.psychiatry.org/SAN. This includes all content shared at the MPS training and additional modules.

Join us at the East Lansing Film Festival

For the first time, the MPS will be hosting a viewing of a film at the East Lansing Film Festival. Following the film, MPS members will comprise a panel for a discussion on mental health and the issues presented in the film.

We are looking for an additional 2-3 MPS members to help with this panel discussion. Please contact Jane Sherzer at MichPsychSoc@gmail.com to join in the member event.

Follow this [Link](#) to learn more about the film to be shown.

The Learn Psych Podcast is an educational podcast about psychiatry, intended primarily for students and trainees. Medical students, NPs, PAs, MSWs, residents, and other psychiatric healthcare providers may find episodes helpful for developing their understanding of psychiatry. I started it because I am a big podcast fan, and love to learn via audio programs, but I didn't find a lot of podcasts out there for psychiatry that are covering curriculum topics in an organized, engaged way.

The advantage of a podcast format is that curious minds can learn for their psychiatry clerkship, residency, or career while driving, exercising, doing chores, and engaging in other activities via the podcast app on their smartphones. So far, I have released 10 episodes, including topics like an introduction to psychiatry, the mental status exam, assessing capacity, evaluation and treatment of delirium, defense mechanisms, and delusional disorder. More content is on the way.

The best way to enjoy the podcast is via a podcast app on your smartphone, like the iTunes podcast app or Overcast for iPhone users. For Android users, I would recommend Podcast Addict or Podcast Republic, though you can find it on just about any podcast app, like Google Play or Stitcher. Just search for "Learn Psych Podcast" (it has a circular black and white brain logo), click subscribe, and start listening to episodes as you go about your daily routine.

You can also listen to episodes on the website, www.learnpsychpodcast.com, where you can subscribe to our newsletter to get updates on new episodes if you prefer to follow via email.

The MPS Needs You

Do you have expertise you can share?

The MPS is called upon from time to time to comment on current events, or to provide specific expertise for a variety of settings. We need your help! Do you have a specific interest or expertise that you can share? Do you know a respected colleague with a specific expertise? Are you willing to be interviewed by the media, speak with policy makers, or provide this expertise in settings outside of your practice?

The MPS Communications Committee is compiling a list of MPS members with expertise in a variety of psychiatric conditions. Please contact us at MichPsychSoc@gmail.com to be included in this initiative.

We need a robust list with a variety of experts: The Michigan Psychiatric Society is actively seeking members who would like to be considered for Distinguished Fellow status in 2017. Interested applicants should contact the office at MichPsychSoc@gmail.com. Details regarding the nomination process: Forensic Psychiatry, Community Mental Health, Substance Abuse Disorders, Eating Disorders, Gun Violence, Integrated Care, GME, Private Practice, Suicide, and Geriatric Psychiatry.

Distinguished Fellow status in the APA and MPS is a high honor; excellence, not competence, is the determining hallmark. The title of Distinguished Fellow is awarded to outstanding psychiatrists who have made and continue to make significant contributions in at least five areas of achievement. These areas encompass a wide range of professional and community activities and provide the opportunity of Distinguished Fellow status to members who have a broad range of skills and activities. A candidate must have been a General Member or a Fellow of APA for at least eight years and be Board Certified. Fellow status is not a prerequisite for Distinguished Fellow consideration.

Contact MPS now to obtain the application information, and to allow ample time to complete what is required. For more information on the application process, please contact the MPS office at MichPsychSoc@gmail.com

A Message from Phil Margolis, MD APA Distinguished Fellow

I want to let you know about the 21st Annual Raymond W. Waggoner Lecture on Ethics and Values in Medicine.

Dr. Waggoner was Chair of the Department of Psychiatry at the University of Michigan for 33 years and continued to serve as a staunch member of the department for the next 25 years.

Dr. Waggoner and I became good friends and the department decided to establish the lectureship in his honor. I have been the chair of the Lectureship for 21 years.

As you will note by the accompanying flyer, Jeffrey Swanson, PhD, Professor of Psychiatry in Behavioral Sciences at Duke University School of Medicine will give the 21st annual lecture, "Gun Violence, Mental Illness and the Law: Balancing Risk and Rights for Effective Policy." on Wednesday, November 2, 2016 at 4 pm to 5:30 pm at Ford Auditorium, University Hospital. For more information, please visit www.psych.med.umich.edu. or Philip M. Margolis, MD at 734- 998- 6180 or Sandra Glover at 734-- 232- 0352.

We hope you will be with us.

Jeffrey Swanson, Ph.D.

Professor in Psychiatry and Behavioral Sciences
Duke University School of Medicine

21th Annual

RAYMOND W. WAGGONER LECTURE ON ETHICS & VALUES IN MEDICINE

“Gun Violence, Mental Illness and the Law: Balancing Risk
and Rights for Effective Policy ”

Wednesday, November 2, 2016

4:00 p.m. – 5:30 p.m.

Ford Auditorium | University Hospital

For more information please visit www.psych.med.umich.edu

Philip Margolis, MD at 734 998-6180 or Sandra Glover at 734 232-0352

Physicians will understand new techniques to reduce gun violence associated
with mental illness

The University of Michigan Medical School is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians. The University of Michigan Medical School designates this live activity for a maximum of 1.5 *AMA PRA Category 1 Credit(s)*TM. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Meet Vanessa Patel

MPS Communications Committee Co-Chair

Where did you go to school?

Medical University of the Americas in Nevis, West Indies.

Why did you choose psychiatry?

I grew up in an Indian household under the influence of American culture, but my parents never failed to

instill in me a strong sense of cultural identity and emphasize the value of education. During that time, much of my attention was drawn towards cultural and other creative pursuits, specifically classical dancing, Indian cuisine and solving jig-saw puzzles. Torn between pursuing such hobbies and taking education more seriously, I chose to attend a college that would cater to both. Once enrolled, I joined the competitive fusion dance team, TCNJ Saathiya, to satisfy one of my passions, while participating in a college education. As required by my Liberal Arts program, I enrolled into an Introduction to Psychology course. Little did I know, I had stumbled upon a field that would inspire me with exhilarating zeal and motivation to learn more about the intricate way in which the mind and body work in conjunction with each other. The content of Abnormal Behavioral Medicine and Psychopharmacology piqued my interest the most and inspired me to pursue a career in Psychiatry.

What do you think is the biggest challenge faced by young psychiatrist new in the field?

Over the past ten years while going through undergrad and medical school, psychiatry has made great improvements within schizophrenia and the medications used for its treatment and management. I believe we have seen significant improvements in standard of living and quality of life, especially for those being treated for schizophrenia, PTSD, substance abuse and autism spectrum disorder. Some challenges we still face is protecting their autonomy and supporting their efforts to secure jobs and be further integrated into society. Regardless of the great jumps made with treatment and management options, the societal prejudice that clouds over mental health is still a great obstacle to overcome for the betterment of patient recovery.

Why do you choose to be a member of the Michigan Psychiatric Society?

I am a people person and I moved out to Michigan for residency knowing only a handful of people and none of them are in medicine, let alone psychiatry. I attended my first MPS meeting in December 2015 as a Henry Ford representative due to another member's scheduling conflicts. When I got there, I learned what it feels like to be a part of a community again and work towards common goals for the betterment of our growing field. I enjoy breaking boundaries and building strong circuits of communication so when Dr. Monteith asked me to co-chair the communications committee with him I felt like I would fit right in. It not only entails helping psychiatrists across the state come closer but it allows me to build more opportunities for residents between different residency programs as well.

What book are you reading right now?

Brain on Fire by Susannah Cahalan

Favorite Movie?

A Walk to Remember

Favorite recreational Activities?

Trying new recipes and watching/choreographing Indian-fusion dance routines

What is the first thing you check on your phone in the morning?

Texts from my husband

Where did you go on your last vacation?

Thailand

Inpatient Psychiatry-Whitmore Lake, MI

Corizon Health, the nation's leader in Correctional healthcare solutions is seeking BC/BE Psychiatrists to provide quality on-site mental health services at the Woodland Correctional Facility, a high paced inpatient facility for severely mentally ill inmates. Full and part-time shifts available. Must have current MI license and DEA. Competitive compensation and benefits including paid malpractice, medical, dental, life, retirement plan, CME and 5 weeks Paid Time Off.

Physician Faculty, Psychiatry
College of Medicine
Central Michigan University

Twelve-month Medical Faculty Position

The Central Michigan University College of Medicine is seeking highly qualified physician faculty for a non-tenure track position in Psychiatry. This is a unique opportunity for physicians to pursue clinical work while contributing to the college's mission focusing on education and research. Successful candidates will assume a role that will include teaching, scholarly activity, clinical practice, and committee service. Positions will be at any rank, depending on credentials.

College of Medicine faculty work collaboratively and interactively to teach the basic medical sciences in a clinically relevant format. The curriculum includes an Essentials of Clinical Skills course in which the bedside skills of doctoring are taught in a manner closely integrated with the basic science curriculum.

Responsibilities include Teaching: Provide general support for an innovative and clinically oriented medical sciences. Assigned teaching loads will be appropriate for clinical practice expectations.

Clinical practice: Engage in outpatient and in community based clinics, participate in developing the practice plan of the College. Scholarly activity: Conduct scholarly activity relevant to the advancement of medicine and/or medical education that leads to publications. Service: Involvement in campus and professional service, participate in career counseling, College of Medicine committees and/or administrative roles.

The College of Medicine will prepare diverse, culturally competent physicians focused on improving access to high quality health care in Michigan with an emphasis on rural and medically underserved regions. Our graduates will aspire to excellence in providing patient-centered and evidenced-based care to their patients and their communities. We will engage physicians in leading health care transformation, lifelong learning and team-based education.

Qualifications & Application Procedure:

For complete position descriptions and required qualifications, please visit www.jobs.cmich.edu and search for openings using Employee Group "Medical Faculty." Applications must be submitted on-line. Questions can be directed to the Assistant Dean, Faculty & Staff Affairs at georgette.r.russell@cmich.edu.

EEO Statement:

CMU, an AA/EO institution, strongly and actively strives to increase diversity and provide equal opportunity within its community. CMU does not discriminate in employment against persons based on age, color, disability, gender, gender identity/gender expression, genetic information, familial status, height, marital status, national origin, political persuasion, race, religion, sex, sexual orientation, veteran status, or weight (see <http://www.cmich.edu/ocrie>.)
